

# Got Silicone?

NASA did at their Glenn Research Center's Plum Brook Station in Sandusky, Ohio.

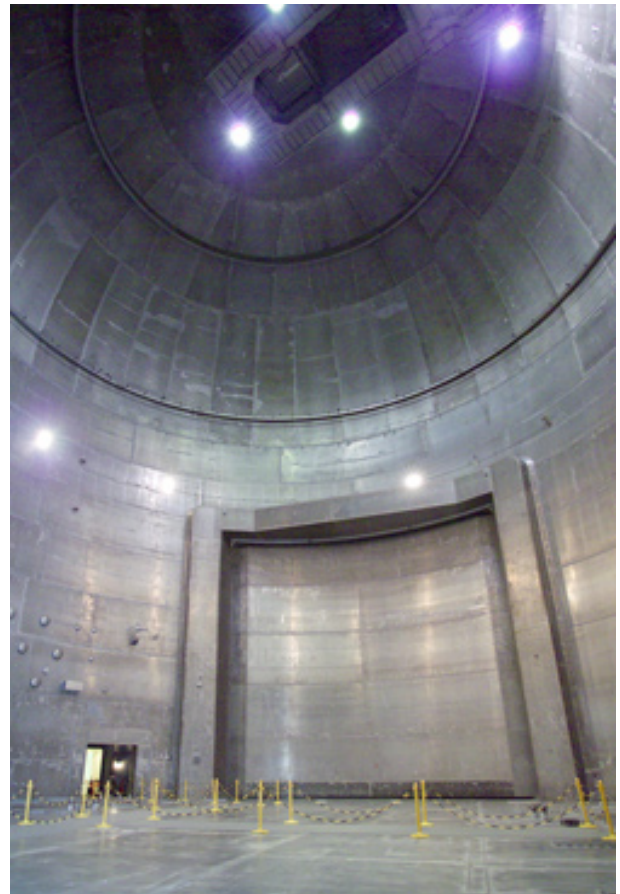

The World's largest vacuum chamber is a massive, cathedral-like structure that measures 100 feet in diameter and towers at 122 feet tall.

**PROBLEM:** One acre of surface area contaminated with silicone oil residue.

**SOLUTION:** Clean surfaces with Digesil DiAqua.

**RESULTS:** Silicone free surface.

Di-Aqua effectively emulsifies silicone oils, greases and uncured elastomers. Its unique cleaning action also quickly and efficiently removes ordinary oils, greases, and soils. Di-Aqua was formulated with the environment in mind and does not contain chlorinated, fluorinated, aromatic or hydrocarbon solvents, or phosphates.
